User Tests:

User: Koen Savaete

Martian (Non-login)

There were no problems with the non-login tasks.

Company

- The user had issues finding the logout button, probably because its hard to find that the company name is replaced with "company name".
- The home page wasn't clear for the user, the user suggest changing overview to home.
- Details for a recent Shipment were not clear, maybe add a icon for details.
- Notifications not found back because there was no text, only a icon. I suggest add text next to the icon.
- Edit icon is not clear, add a button visualization with text.

Marketplace

- Button new Outgoing Request was not found back, I suggest add the all button on top and not under the recent Outgoing Requests.
- Place a bet wasn't found back easily, suggest add the place a bet button not only on the details frame.
- The user didn't understand correctly what they mean with "fulfill", suggest changing the word.

Government

- User didn't found back the active & available policies for the colony, I suggest add the button multiple times on different pages.
- User was confused when the Transport Details where not named "X172 - 514", I suggest add the colony name and not Colony 1 or Colony 2, fix this.
